

# UltraVent CombiDuo exhaust hood Plus XS 6 2/3 E Combi-Duo

The high suction power of Metos UltraVent® Plus XS Combi-Duo hood effectively condenses steam released from the oven and filters out grease particles from the cooking air. The steam produced in the oven is conducted via the oven's steam pipe and when opening the oven door. In this case, the special filters of the UltraVent® Plus XS Combi-Duo hood filter and break up released steam and annoying smoke produced during roasting and grilling, thereby keeping the indoor air cleaner.

The Metos UltraVent® Plus XS Combi-Duo hood is also suitable for Combi-Duo installation, with two stacked ovens. intended for Metos SelfCooking Center XS and Metos Combimaster Plus XS oven models.

Using the integration kit (optional extra), Metos XS and UltraVent® Plus can be retrofitted.

Metos UltraVent® Plus XS Combi-Duo hood is an excellent alternative to complex and bulky ventilation systems, as it does not require an extraction connection, rather the waste water is conducted via the oven into the drain. In addition, the hood reduces the oven's cooling requirement, thereby also reducing water consumption.

By using the Metos UltraVent® Plus XS Combi-Duo hood, the Metos SelfCooking Center XS and Metos Combimaster Plus XS ovens can be installed even in demanding sites, such as a restaurant's open-plan kitchen or shop service desk. This fuss-free appearance of the stainless steel hood is appealing and the even surface makes it easy to keep the appliance clean.

- Combi-Duo model (two stacked ovens)
- intended for Metos SelfCooking Center XS and

Metos Combimaster Plus XS oven models

- high blowing power
- two grease filters
- the stainless steel grease filters can be washed in the dishwasher
