

## Bun steamer BS460-EU

The Metos Bao Bun -Dimsum BS460-EU steamer is intended for the storing of speciality buns and can also be used to sell and display the buns, as it is an eye-catcher. The steamer is specifically designed for Bao buns, Dim Sum and other dumplings, as well as similar speciality items. The steamer can also be used for pies, pasties and any other items that require a humidity regulated storing space. The maximum temperature of the steamer is 85°C, thus it can also be used for reheating baked goods. The spacious water tank, clear temperature display and short-cut keys make it easy and quick to use the steamer. The steamer has a uniform special curved glass display, which stretches to three sides and, together with the efficient lighting and the leaning shelves, guarantees maximum visibility. Thanks to the five, 383x364 mm sized grated shelves, the steamer offers plenty of space for selling and displaying, despite its seemingly small exterior. The steamer's frame is made of stainless steel. Moreover, as the door opens fully across the whole steamer and the shelves are removable, it is extremely easy to clean the inside of the steamer, without having to reach around.

- intended for storing/steaming of Bao buns, Dim Sum and other speciality items
- designed for service sales, can be imbedded into a kitchen equipment line
- showy, 180° curved uniform glass display, which covers three sides of the steamer
