

The Metos Thermobox E60 food transport trolley is an efficient solution for heat storage and transportation of warm food. The trolley's patented membrane resistance heating and precise electronic temperature control ensure safe and high-quality conditions for storage and transportation of warm food. The E-trolley keeps the temperature at the desired level with minimal temperature fluctuations. The temperature control unit is located at the top of the trolley and has a large digital temperature display.

The trolley is insulated with polyurethane, which expands under high pressure and unites the trolley's construction and the inner chambers into a strong and well-insulated unit. The trolley's energy-efficient insulation ensures safe and high-quality conditions for storage and transport of food.

The trolley can be used in small spaces. The trolley is easy to clean as its inside is completely made of stainless steel and has pressed GN guides without any joints. Large rubber wheels as well as bumpers and ergonomic handles around the stroller make the stroller easy to handle and light. The robust door can be opened comfortably by pulling the handle, which is integrated in the frame. The door opens to the side, 270 degrees.

- the capacity is 4xGN1/1, inner dimensions: 330x540x351 mm, guide distance 80 mm
- temperature range: +30°C...+90°C
- four hot-dip galvanized steel 160mm wheels with rubber tires, two swiveling with brakes and two fixed without brakes
- the wheel bracket is made of hot-dip galvanized steel
- the exterior of

the red trolley is made of ABS plastic

- stainless steel handle and PVC plastic corner
- the bumper is made of galvanized steel and coated with PVC plastic
- Shuko connector connection, 1,5-2 m spiral cord and holder for plug
