

Food transport trolley

Metos Thermobox C180

Washable

Metos Thermobox C180 Washable food transport trolley is an efficient solution for cold storage and transportation of cold food. The uncompressed, active cooling of the C-trolley ensures safe and high-quality conditions for the cold food. This version of the C180 is machine washable. Controls for the temperature are located behind a sealed cover on the back of the unit. In addition, a cover is included for both the cooling unit and control unit, but it is not shown in the picture.

The trolley is insulated with polyurethane, which expands under high pressure and unites the trolley's construction and the inner chambers into a strong and well-insulated unit. The trolley's energy-efficient insulation ensures safe and high-quality conditions for storage and transport of food.

The trolley can be used in small spaces. The trolley is easy to clean as its inside is completely made of stainless steel and has pressed GN guides without any joints. Large rubber wheels as well as bumpers and ergonomic handles around the stroller make the stroller easy to handle and light. The robust door can be opened comfortably by pulling the handle, which is integrated in the frame. The door opens to the side, 270 degrees.

- the capacity is 12xGN1/1, inner dimensions: 330x540x1000 mm, guide distance 80 mm
- temperature range +1°C...+9°C, factory setting +3°C
