

Bakery glass display Metos Cube Jewelry 1000

Stylish Metos Cube Jewelry display for full-service has a trendy design and helps the products to look attractive on every shelf, providing a fine framework for the sales

The top structure of the display is made of tempered glass. The products are at the same height (900 mm) as the sales line, so that the customer has a direct view on the display. The front glass is hinged, making it easy to keep it clean. The seller's side has easy-to-open sliding doors.

The frameless top part of the Metos Cube Jewelry display creates a clear and unobstructed view on the display from all sides. The explicit design of this glass display allows it to be placed in a coffee house, bakery or a hotel lobby.

The glass display, equipped with an electronic control unit, has an automatic defrosting function. Cool air circulates evenly through the whole display with the help of a cooling fan. The temperature range is +4...+8C (ambient temperature +25C and relative humidity 60%).

- sales area 0.7 m²
- sliding doors on the seller's side
- hinged front glass
- temperature range +4...+8C (ambient temperature +25C and relative humidity 60%)
- electronic control
- fan cooling
