

Black compartment basket Metos with black heightening frame

Designed especially for washing of glass. Offers excellent protection for fragile glass during washing, transportation and storage. Color coding facilitates recognition of glass. Racks in the work pieces reduce the contact area to the minimum and prevent the threats from arising. Fits all dishwashers with standard dimensions. The material is made of lightly clean and scratch resistant polypropylene. Even fully loaded, the basket keeps the shape as a result of its rugged design, it slides easily on surfaces and even on conveyors.

Thanks to the design on the bottom of the basket, they are handy to stack, which eliminates transport and storage of the baskets. The structure of the double walls still makes the basket without unnecessary extra weight.

The diagonally placed handles offer a steady lifting grip and support for the carrying, with little muscle strength. The smooth walls make it impossible for laundry and dirt to accumulate in the structure of the basket. The open bottom structure makes the water feasible. Because of this, the water jet can easily reach the vessels and the dirt water do not accumulate in the structure of the basket.

Black compartment basket Metos with black heightening frame

Product capacity	16 pcs. Ø110 x 170 mm glass
Item width mm	500
Item depth mm	500
Item height mm	206
