

## Rice-vinegar mixer Metos Shari Robo KS-726-CE

The mixing process of rice and vinegar only takes about five minutes, but as a routine procedure it is extremely laborious. A separate mixing machine guarantees an even mixing process and, in addition, cools down the sushi rice to the perfect temperature. The fully automatic rice mixing machine Shari Robo KS-726-CE mixes rice, vinegar and spices evenly, cools down the finished product automatically and can produce as much as 12 kilograms of rice in four minutes. After cooling down, the tank can be emptied easily by setting it into a lower position by pressing a button. The shape of the rice tank, as well as its rotation direction and rotation speed, give an even mixing result without changing the rice's consistency. The extremely efficient fan motor cools down the sushi rice in a ball-like tank, which immediately removes the moisture and heat from the rice. The circulating cool air also removes the stickiness and tartness from the rice. These ensure a perfect consistency and flavour. The Shari Robo KS-726-CE rice mixing machine is very easily operable due to its clear control panel. The machine has nine program settings to which you can set up specific mixing, resting, cooling and blowing speed programs. In addition, there are six program settings to which you can set up specific tank rotation direction and cooling programs. The machine can also be operated manually. The machine can be cleaned extremely easily, as all the washable parts can be removed quickly. Both the outside and inside of the tank have a non-stick coating.

- floor model
- fully automatic rice

and vinegar mixing and cooling

- rice capacity 12 kg
- fast process; mixing, resting, and cooling in 4 minutes
- control panel shows the program phase, alarm sound when rice is ready
- 9 program settings, can also be operated manually
- air cleaning function; high performance filter
- non-stick coating on the tank
- overheating protector in the motor

**DELIVERY INCLUDES:**
